

KAMAREDEDY DISTRICT

We acknowledge the content from:

<https://kamareddy.telangana.gov.in> › document › district-profile

The district is spread over an area of 3,652.00 square kilometres (1,410.05 sq mi) making it the 15th largest district in the state.^[4] Kamareddy is bounded by [Nizamabad district](#) on North, [Sircilla district](#) and [Siddipet district](#) on East and South East respectively, it is bounded on South by [Sangareddy district](#) and [Medak district](#) and on the West and South West by [Nanded district](#) and [Bidar district](#) of [Maharashtra](#) and [Karnataka](#) states respectively.

NATURAL RESOURCES

FOREST:

The total Forest area in the District 82,190.48 Hectares farming 22.43 percent of the Total Geographical Area of the District. The thick Forest belt produces Timber, Fuel, Bamboo and Beedi Leaves, which yield good revenue. Custard Apples grow well in this District.

SOILS:

The important soils are Black Soils and Chalka (Sandy Loamy) and they constitute 52 Percent and 48 Percent of Total Area of the District respectively. The erstwhile blocks of Madnoor and Banswada are predominantly covered by Black Soils and other area of the district is covered with Chalka Soils

MINERALS:

The district is not rich in minerals, Iron ore of poor quality occurs at a few places as laterite and ferrogenous quartzites. Aluminous boles containing 24% to 35% alumina are reported from Gurja Kunta of Bhiknoor Mandal and Karedpally in Tadwai Mandal. White calcareous Kaolinised earth is found near Tippapur, Bhiknoor and Kupriyal. Granites of various quartzes and Deccan trap rocks yield excellent material for buildings and roads.

RIVERS:

The Principal rivers flowing in the District is Manjira. The Manjira rises in Potoda taluk of Bidar district in Karnataka State, enters the district from south west. The waters of Manjira are being utilized for irrigation through the Nizamsagar dam constructed across the Manjira River near Achampet (V) in Nizamsagar Mandal.

In addition to the above a Perennial Stream viz., Kowlas Nala Vagu is being flown from Karnataka State enters the District in Jukkal Mandal. A Mini Project has been constructed across the Vagu at Lingampali and Sawargaon villages of Jukkal Mandal and being irrigated some of the villages of Jukkal and Bichkunda Mandals.

Kamareddy district is one of the agriculturally developed district in the Telangana state. Beedi Rolling is a well known household industry and plays an important role to provide economic activity among women. The sugarcane plantation is one of the major crops of this district. In view of this Sugar factories like Indira Sugars and Gayathri Sugar factories are established. They play an important role in the economy of the district of Kamareddy District.

PLACES OF HISTORICAL AND RELIGIOUS ATTRACTION.**KALABHAIRAVA TEMPLE:**

It is situated in Issannapally village of Sadashivnager Mandal. The image of Bhairava is characterized by elements of 23rd Thirthanker Parswanatha.

SIDHIRAMESHWARA TEMPLE:

One of the famous Shiva temples is located in Bhiknoor Mandal. An epic story is popular on construction of this temple. Many pilgrims around South India visit this temple.

Sri Baswappa Lingappa Swamy Temple:

The famous Lord Sri Basawa Lingappa Swamy located in Bichkunda Mandal nearby Maharashtra and Karnataka stated.

Forts:

Domakonda fort built by Rashtrakuta rulers around 10 AD. The fort was restored by Kamineni Family in 1786 who ruled this region from here. Kowlas Fort in Kowlas village of Jukkal mandal.

The District derived its name Kamareddy from the ruler of Domakonda Fort Chinna Kamireddy, who ruled this area during AD 1600 to 1640. Old name of this place is KODURU. This village exists in the place where Kishtamma Gudi now existing. In Harijanwada area there was temple called KODURU HANMANDLA GUDI.

This temple is oldest in the History of Kamareddy. Apart from this temple there are another (3) Temples which are the proofs of Kamareddy i.e., 1.Kishtammagudi, 2. Venu Gopala Swamy Gudi and 3. Vittaleshwara Alayam. In Kakathiya Dynasti this place was ruled by KAKARTHYA GUNDANA, proof of this is available in Sri Raja Rajeshwara Swamy Temple in Banda Rameshwar Pally village of Machareddy Mandal.

The leaders of this district involved in the “Quit India moment” launched by the Indian National Congress under the leadership of Mahathma Gandhi along with the rest of Telangana.

The District is bifurcated from residual District of Nizamabad and formed as Kamareddy District from 11-10-2016 with (3) Revenue Divisions viz., Kamareddy, Banswada and Yellareddy and (22) Mandals including (1) Municipality i.e., Kamareddy. Rajampet, Bibipet, Ramareddy, Peddakodapgal and Nasrullabad are formed as new mandals apart from existing (17) Mandals.

Kamareddy district is partially industrially developed. There is scope for agro based industries in the district as paddy, maize, turmeric, soya are the main crops. The Small Scale industries and tiny industries that have come up in the district are mostly agro based.

The sector wise project opportunities are given here under:**Food based:**

Modern Rice mills / Paraboiled Rice Mills, Seed processing, Vegetable Oil Refinery, Maize Starch, Mini Dhal mills, Oil mills, Spice powders, Bakeries, Ice cream, Confectionery, Chilly & Masala powder, Vermicelli, Veg. Noodles, Biscuits and cookies, Tissue Culture, Pickles, Papads, Groundnut, chikkie, Cattle Feed Poultry Feed etc.

Service oriented:

Agricultural Implements, Servicing of Agricultural Equipment like motors, tractors, oil engines, Auto mobile services.

Textiles:

Ready made garments, Cloth weaving, School uniforms, Hosiery, Screen Printing on cloth sarees, Spinning Mills.

Plastic & Rubber:

Plastic Reprocessing, Plastic files and folders, Plastic Electrical goods like, T – Joints, Elbows, Bends etc, Polythene Bags, Plastic beads and Bangles, Tyre Retreading.

Construction:

Aluminium Builders Hardware, Cement Hollow Bricks, Clay Bricks, Centering material , Light weight bricks.

Chemical and allied:

Black Phenyl & White Phenyl, Utensil washing Powder, Acid

Paper based products:

Exercise note books, registers Greeting cards, Visiting cards & Wedding cards, Paper napkins, White duplex paper.

Others:

Steel and Aluminum furniture, Automobile repair workshops, Aluminum Utensils, Cyber cafes, Data Processing centers, Mineral water

AGRICULTURE

The District Economy is mostly dependent on agriculture sector. The increase in agriculture production and productivity will boost the health of district economy.

The Department of Agriculture as one arm of the government has been established to perform the following functions in the process of harmonizing the farming community.

Soybean production:

There is wider growth potential for production of certified seed production at farmer level particularly in Gandhari, Tadwai, Rajampet, Bichkunda, Peddakodupgal, Madnur, Pitlam, Sadashiva Nagar where the predominant soils are black which are highly suitable for Soybean production. Hence there is a need to establish a Soybean Seed Processing unit at Gandhari / Bichkunda and one Soybean Post Processing unit at Kamareddy which will give competitive Market price to the farmers.

Pulses Production:

In Kamareddy and Bichkunda agriculture divisions, where the crops are grown mainly under rain fed condition, is highly suitable for short duration crops like pulses and oilseeds. Here is great potential for taking up pulses as well as Oilseeds like Groundnut and Sunflower production.

Maize production:

In Yellareddy and Kamareddy Agriculture divisions, Maize is a predominant rain fed crop with low production/productivity levels. There is a great scope to increase the productivity with available water resources under micro-irrigation (Drip).

State Seed Farm:

This farm is located in Malthummeda village of Nagareddypet Mandal, which is about 42 Kms from District Headquarters. This Seed Farm is having a land of 324.22 Ha in Sy.No. 838 and 834

of Malthummeda Village. In which 24.28 Ha given to Horticulture Department. In the remaining land of 299.94 Ha only 89 Ha has brought into cultivation with water source of Pocharam Project canal through lift irrigation.

Boppaspally State Seed Farm:

This farm is located in Birkur Mandal, which is 70 Kms from District Headquarters. It is having an area of 199.60 Ha with Cultivable area of 90 Ha. This farm is having irrigation source from Nizamsagar Canal.

If these (2) Seed Farms develops to the total potentiality, the certified seed can be produced for Paddy and Soybean Crops.

DAIRY DEVELOPMENT

Foundation stone laid to establish Milk Chilling Center at Someshwar Village of Banswada Mandal on 13-10-2016. Converting Errapahad Milk Collection Centre of Tadwai Mandal as Milk Chilling Center, where potentiality for Milk is very High. Bulk Milk Cooling Units may be established at Jukkal, Mothe village of Lingampet Mandal, and Machareddy Mandal.

In the District headquarters TSDDCF Ltd Kamareddy Milk Chilling Centre is available. This Dairy capacity is 20,000 Ltrs per day. There are 10 Bulk Milk Cooling Units under this dairy. As on to-day 35,000 Ltrs of Milk is procuring per day from 99 Milk Collection Centres in the District. 7354 Milk Producers are benefitting from Milk Production.

NIZAMABAD

we acknowledge the content from <https://nizamabad.telangana.gov.in/>

The District derived its name as Nizamabad (Nizam-a-abadi) from the Nizam of Hyderabad Asaf Jahi, VI who had ruled Deccan during the 18th century A.D. Originally the District was called Indur known to have originated in the name of king Indradatta who had ruled this region during the 5th century A.D.

Some of the major ancient dynasties which extended their rule to the district are Mauryas, Satavahanas, Rastrakutas, Chalukyas and Kakatiyas and in the medieval Bahamani Sultans, Qutub Shahis and Barid Shahis and in the modern period Mughals and Asaf Jahis.

During the Prime Minister-ship of Sir Salar Jung-I in the 1876 A.D., the districts in the Nizam's Dominion were re-organized where upon Indur became a District.

The district in its new shape was christened as Nizamabad. Before 1979, there were (7) taluks in the district. However, during December, 1979 Armour and Kamareddy taluks have been bifurcated and (2) new taluks Viz, Bheemgal and Domakonda were formed. With these two taluks, the number of taluks rose from 7 to 9.

On 11.10.2016 New District is formed with 27 mandals.there are I corporation two municipalities in the district.recently 8 new Mandal are formed they are Mupkal,Mendora,Yergatla, Nizamabad North, Nizamabad Rural , Nizamabad South Mugpal,Rudrur.

Nizamabad town has the largest population of 3.10 lakhs as per 2011 Census.

While Armour town has the lowest population of 64,042. Nizamabad town has become Municipal Corporation in March, 2005 and Armour town has become Municipality in May 2006. There are total no of thandas in district are —, no of thandas are to be proposed as Grama Panchayaths are —

Nizamabad district is bounded on the North by Nirmal district and on the East by Jagital district, on the South by Kamareddy district on the West by Nanded district of Maharastra State The geographical area of this district is 4288 Sq.Kms.

NATURAL RESOURCES

FORESTS:

The total Forest area in the district is — lakhs hectares farming — percent of the total geographical area of the district. The thick forest belt produces Teak, Ebony, Blackwood, Nallamaddi, Yeppa, Bijasali and Tarwar. The Teak forests for which the district was once famous have been considerably reduced due to the indiscriminate and unscientific exploitation.

The forest produce which includes Timber, fuel, Bamboo and Beedi leaves yield good revenue. Mangoes and Custard Apples grow well in this district.

SOILS:

The important soils are black soils and chalka (Sandy loamy) and they constitute 52 percent and 48 percent of total area of the district respectively. The erstwhile Block of Bodhan, are predominantly covered by Black soils and other Blocks are covered by chelka soils.

MINERALS:

The district is not rich in minerals, Iron ore of poor quality occurs at a few places as laterite and ferrogenous quartzites.

RIVERS:

The Principal rivers flowing in the District are the Godavari on the northern boundary and Manjira, the chief tributary of the Godavari. The Godavari originates in the Western Ghats at Triambak near Nasik in Maharashtra State. It flows for about 113 Kms., on the northern boundary of this district separating it from Nanded and Nirmal districts and finally enters into Jagital district. The Manjira rises in Potoda taluk of Bhidar district in Karnataka State, enters the district from south west and joins the Godavari near Kandakurthi in Renjal Mandal. . Nizamabad district is one of the agriculturally developed district in the Telangana state. Beedi Rolling is a well known household industry and plays an important role to provide economic activity among women. The sugarcane plantation is one of the major crops of this district. In view of this Sugar factories like Nizamsugar factory, is established. And play an important role in the economy of the district. Now it is not working.

PLACES OF HISTORICAL AND RELIGIOUS ATTRACTION:

LIMBADRI GUTTA-

There is Lord Sri Narasimha Swamy Temple on Limbadri Hills situated in Bheemgal Mandal.

QUILLA RAMALAYAM-

This Quilla (fort) was built by the kings of Rashtrakuta dynasty during 10th century. While the Kalyani chalukyas added Hindu elements to the temple. The Kakatiya rulers restored this.

NEELAKANTESHWARA TEMPLE

This temple built in Nizamabad around 10 AD by Satavahana king, Satakarni – II, with architecture style of Jains, Vaishnavite and Shivaite.

SRI CHAKRESHWARA TEMPLE

It is built by Kalyani Chalukyas , famous Shiva temple, situated in Bodhan town.

HANMAN TEMPLE

Located in Sarangapur village and it is said that saint Samartha Ramdas, the Guru of king Chatrapathi shivaji has laid the foundation to the temple about 450 years ago.

Ashta Mukhi Koneru

Narsimha Swamy temple was built around 9th century by the Chalukyas, Ashta Mukhi koneru was also built subsequently which is a stone carved pillar and platform structure is giving a very good appearance.

FORTS

Sirnapally fort built in 19th century under seelam Janakibai who was appointed as its ruler by the Nawab of Nizam.Sadulla Hussain Dargah –Badapahad. It is most important pilgrim centre in the district located in Jakora Village of Varni Mandal.

CSI church

The churches built at the beginning of 20th century, in Dichpalli and Dharmaram mandals are among the most important in the district.

PLACES OF TOURIST IMPORTANCE

There are many places of tourist importance in the district. Prominent among them are Sriram Sagar, , Alisagar and Nizamabad fort. Apart from these, there are places of religious prominence like Limbadri Narsimhaswamy Temple, Peddagutta etc.

SRIRAM SAGAR PROJECT (SRSP)

This is one of the biggest projects in Telangana , which was constructed across the River Godavari at pochampad village of Mupkal Mandal. Former Prime Minister of India late Sri Pandit Jawaharlal Nehru, laid the foundation in July, 1963. The project provides irrigation water for about 3.92 lakhs Hectares in Nirmal, Nizamabad, Jagital, Warangal and Khamam districts. Also provides drinking water to Jagital and Warangal districts. The project site is an important tourist spot. The APGENCO Power Generation House, Lord Rama & Shiva Temples located there are worth seeing.

ALISAGAR RESERVIOR

This reservoir is situated at a distance of 13Kms from Nizamabad town, which is an important picnic spot to Nizamabad public. This huge reservoir was constructed in 1931 by the Nizam. Flanked by natural hills and beautiful flower gardens, the reservoir and its surroundings are rich in scenic beauty. Boating facility also available to the visitors.

ASOK SAGAR

This Sagar is situated at a distance of 8 Kms from the District Head Quarters towards the Bodhan town. Recently, a Picnic Spot has been developed which attract visitors from Nizamabad, where

Boating facility is also provided. A 18 ft statue of Goddess Saraswathi in the middle of the lake attracts the visitors a lot.

KANDAKURTHI, TADPAKAL AND POCHAMPAD

These are the three places recently identified for “GODAVARI PUSHKARALU’ and developed by constructing “Snanaghattalu” as well as bath rooms and shelters for the visitors. The District Administration is taking steps to develop these places as Picnic Spots.

Agriculture

Extension (Regular):

Each Assembly constituency has a Asst Director of Agriculture (R) supported by a Mandal Agriculture officer in each mandal and a Agriculture Extension officer for every 5000 acres .

Soil Testing Laboratory:

There are two soil testing laboratories in the district.

- i. Soil Testing Laboratory, Nizamabad
- ii. Soil Testing Laboratory, AMC, Bodhan

Soil testing laboratory is headed by an Asst Director of Agriculture (STL) and supported by 3 Agriculture officers.

Biological Control Lab:

Biological control lab was established in Nizamabad district with an objective to produce bio agents like Trichoderma viridae, Pseudomonas for distribution under various departmental schemes on subsidy. These biological agents are promoted as alternate to the chemical insecticides and fungicides.

This Laboratory is headed by an Asst Director of Agriculture assisted by an Agriculture officer.

Farmers Training Center (FTC):

Farmers Training Center is involved in training of farmers in various aspects of agriculture including skill development of agricultural labour, transfer of latest technology to the farmers and organizing field visits and exposure visits. Farmers training center also conducts orientation training to the department officers on the schemes, their guidelines and extension techniques in implementation of the schemes.

Farmers Training Center is headed by a Deputy Director of Agriculture (FTC) supported by two Asst Directors of Agriculture and two Agriculture officers.

Services Provided by Department of Agriculture

Services provided by Department of Agriculture can be broadly classified as under

- i. Input supplying services
- ii. Quality control of inputs
- iii. Extension services
- iv. Other activities

Input Supplying Services

Agriculture Department assesses the requirement of inputs like seed, Fertilizer, insecticides, credit requirements and makes necessary arrangements for supply of inputs. Farm implements are also supplied under Farm mechanization scheme.

Quality Control Services

Agriculture officers and above cadre officers are notified as Seed, Fertilizer and Insecticides inspectors as per the different G.Os and they perform the duties of Seed, Fertilizer and insecticides inspectors. The main functions are periodic inspections of the input outlets and implementation of the different provisions of the statutes.

Extension Services

- i. Agriculture department organizes demonstration of improved technologies, conducts Trainings to improve crop production and to reduce cost of cultivation.
- ii. Making extensive field visits and ensure production of the crop as per the recommended package of practices.
- iii. Diagnosing the pest and disease and suggest remedial measures which include forecast of outbreak of pest and disease on various crops.
- iv. Based on the Government policies and existing market situations and seasonal conditions advisories are provided to the farmers on what type of crops to be cultivated.

Some of the important schemes that are under implementation are

- i. Soil Health card scheme
- ii. Seed Village program & Certified Seed production
- iii. Farm mechanization
- iv. National Food Security Mission
- v. National Mission on Oilseeds, Oil Palm.
- vi. Paramparagath Krishi Vikas Yojana (Organic Farming)
- vii. Area Development under NMSA
- viii. General Seed Distribution
- ix. Monitoring of Fertilizer distribution.

Other Activities

- i. Assessment and payment of input subsidy in case of Natural calamity
- ii. Co- ordination with bankers and notified Insurance company in Crop insurance
- iii. Ensuring institutional credit to the farmer
- iv. Crop cutting experiment in co-ordination with Directorate of Economics and Statistics
- v. Agriculture Statistics in co-ordination with Chief Planning officer
- vi. Joint Azomaish in co-ordination with Revenue and irrigation
- vii. All other miscellaneous duties as assigned by the Higher Authorities

Soil Health Card Scheme Under National Mission For Sustainable Agriculture

Objective:

To evaluate the fertility status, identify and reclaim the problematic soils, promote soil test based fertilizer usage, adopt balanced and integrated use of fertilizers and improve soil health.

Seed Distribution on Subsidy

Objective:

Seed, a critical determinant in increasing agriculture production and supply of quality seed is an important intervention to increase production and productivity of any crop.

Seed Village Program

Objective:

To ensure timely supply of quality certified seed of notified varieties to the farmers at affordable prices besides ensuring quick multiplication of new seed varieties in a shorter time based on crop situation.

Fertilizers

Department of Agriculture monitors the supply of Inorganic fertilizers like Urea, Complex fertilizers and MOP supplied by the Fertilizer manufacturing / importing companies. Movement of fertilizer is done after the approval of the District Level Committee on Monitoring of Fertilizer movement headed by the District Collector and consisting of District Manager, District Agriculture officer, MARKFED (nodal agency for maintaining Fertilizer buffer stock), District Co-operative officer.

Farm Mechanization

Objective: To improve efficiency of farmers by way of farm mechanization, thus, rising productivity level/net income per hectare, reducing cost of cultivation and improving product quality through use of post harvest machinery/processing methods.

Credit (Crop Loans)

Objective:

To provide timely agriculture credit to farmers at lesser interest rate.

Vaddileni Runalu and Pavala Vaddi-

Objective: To provide interest free crop loans to farmers upto Rs. 1.00 Lakh and pavala vaddi to farmers who have availed crop loan from Rs. 1.00 Lakh to Rs. 3.00 Lakhs, repaid in due date.

Crop Insurance – Pradhan Mantri Fasal Bhima Yojana(PMFBY)

Objectives:

- i. To provide insurance coverage and financial support to the farmers in the event of failure of any of the notified crop as a result of natural calamities, pest and diseases.
- ii. To stabilize the income of farmers to ensure their continuance in farming

- iii. To encourage farmers to adopt innovative and modern agricultural practices
- iv. To ensure flow of credit to the agriculture sector.

Quality Control Of Inputs-Seed, Fertilizers and Pesticides.

Objective:

To ensure the availability of quality seed, fertilizer and pesticide to the farmers by enforcing the laws. Agriculture officer is notified as Seed Inspector, Fertilizer inspector and Insecticide Inspector for his jurisdiction for enforcing the provisions of Seed Act 1966, Fertilizer Control Order 1985 and Insecticides Act 1968.

National Food Security Mission(NFSM)

Objective:

To increase production of pulses and coarse cereals through area expansion and productivity enhancement in a sustainable manner.

National Mission On Oil Seeds and Oil Palm(NMOOP)

Objective:

To increase production of vegetable oils sourced from oil seeds through area expansion and productivity enhancement in a sustainable manner.

The Components under this scheme include Water saving devices like Sprinkler and drip irrigation systems, supply of Gypsum, Micro nutrients, Plant protection chemicals, Weedicides etc under subsidy.

Rainfed Area Development Program(RAD)

Objective:

To provide agriculture based income generating opportunities and sustaining the rainfed agriculture through optimum utilization of natural resources and resources created through various interventions.

Paramparagath Krishi Vikas Yojana(PKVY):

Objective:

To achieve sustainable and eco-friendly model of chemical residue free agricultural production by promoting organic farming.

The Components Under PKVY Include

- i. Mobilisation and Formation of cluster
- ii. PGS Certification and Quality control

- iii. Action plan for organic farming for each cluster
- iv. Integrated Manure management
- v. Custom hiring Centers
- vi. Packing, labeling and branding of organic products of the cluster

Agriculture Technology Management Agency(ATMA)

Objective:

To develop an efficient, effective, demand driven, research intergraded and financially sustainable public extension systems, capacity building skill up-gradation of farmers and extension functionaries and strengthen the research farmer's linkage.

Natural Calamities

Objective:

TOURISM

The main object of the Department is to promote tourism destinations by providing all necessary amenities and to develop tourism places in all Spheres to increase the visitors / tourists. The distance from state capital Hyderabad to Nizamabad is 170 k.m. by bus and the distance by train is 160 K.m. There are number of buses from MGBS, Hyderabad and JBS Secunderabad to Nizamabad on the same time number of trains also available from Secunderabad and Kachiguda railway station.

Department Activities:

The Activities of the department is to promote the tourism destinations by providing necessary amenities Two Guides are working in the district to guide the tourist/Devotees at Navanath Temple, Siddula Gutta, Dichpally Ramalayam. Ali Sagar garden and boating has been leased out to Sri. Chaithanya yuvajana Sangam, Thanakalan and Ashok Sagar has been rented to Bhagath Singh yuvajana Sangam, Janakampet.

Ramalayam Dichpally:

The Dichpally Ramalayam located at a distance of 20 k.m. from Nizamabad enroute Hyderabad. The temple was built in the 14th century by Kakatiya Kings, the Dichpally Ramalayam is the one of the oldest temple in the Nizamabad. Temple was built of black and white basalt stone, with the finest architecture and excellent craftsmanship of goddesses, animals, devils and Khajuraho style erotic structures on it. This ancient temple has awesome sculpture with extremely beautiful carvings on temple walls, ceilings, pillars, and door frames.

This temple has 105 steps and a pedestrian subway connecting it to Raghunadha Temple in the Nizamabad urban center. The temple is visited by thousands of devotees on the festival Sri Rama Navami.. The Dichpally Ramalayam is one of the finest example of stone architecture, built in white and black Basalt stone. The entrance to the steps is graced by a decorative gateway “Keerthi Thorana” which is richly engraved and bearing the Kakatiya style of architecture. The Surrounds area of the temple fills with water every year during the monsoons and the temple assumes the look of an island.

Raghuanatha Temple:

Nizamabad fort, also known as Nizamabad of quilla, was built in tenth century by Rashtrakuta Kings situated at south west of Nizamabad city. The fort has a large area surrounded by Masonry walls and huge bastions resembling Muslim architecture. Raghunatha temple is on the top of the fort and is a major tourist attraction. Believed to have been built by Chatrapathi Shivaji. The temple has spacious halls spread over an area of 3900 square feet with unique system of ventilation that keeps it cool in summer in particular. There is a prison within this fort premises where “Dasharathi Krishnamacharyalu” a legendary poet and writer spent his life during initial year of independence. The time he spent in this jail was well utilized in writing poetry. His famous quote “Naa Telangana Koti Rathanala Veena” has been and is being used right from the initial periods of Telangana liberation till date.

Siddulagutta – Armoor :

Sri Navanatha Siddeshwara temple is located in Armoor town about 27 K.m. Northeast at Nizamabad district. There are beautiful rock formation around this temple with extends up to 2 K.m. legend says that, on this hillock and hence it is called as Navanathapura.

There are many temples on the hillock namely Shivalayam, Ramalayam, Hanuma Temple, Durga Devi Temple and all these temples are believed to be Swayambhu Temples. Inside these caves is a Shiva Temple, where the Shiva Lingam is said to be swaymbhu or self-manifested. The entrance to this cave temple is a door that is barely three feet. Just outside the exit point of this narrow cave is a Ramalayam and the temple tank, Jeeva Koneru. Fifteen years ago a ghat road was built through the rock formation, leading straight to Siddulagutta. There is also a walkway from the Gol Bungalow for pilgrims wishing to do the climb up to the temple by foot.

Bada pahad:

Badapahad Dargah or Peddagutta is a Muslim Pilgrim Centers. Built in the memory of the Saint Hazrat Syed Sadullah Hussain, the mosque is situated atop a hillock near Jakora in the Varni Mandal of Nizamabad district. Many Muslim devotees as well as Hindu devotees climb hill and visit Saint Sadullah Hussain Baba. The three annual festival of Ursu at Badapahad is held every year in September month. Telangana, Andhrapradesh, Maharashtra and Karnatak people attend this occasion and festival in every year. Dargah is located between the hills of Chandur and Varni, the Bada Pahad Dargah site is also used as a huge ropeway project. The ropeway will also

be used as a mode of transport to access the mosque. There are around 1000 steps to reach the summit of the hill where Dargah is located.

Bada Pahad Dargah is Located in Bada pahad village, about 15 k.m from varni and 43 k.m from Nizamabad. Situated on the huge hill (Bada Pahad), this prominent Dargah is visited by scores of devotees every year from the neighboring districts and states.

Ali Sagar:

Ali sagar reservoir located in jankampet village. Yedlapally Mandal 2 km off the Nizamabad – Basar road, is a scenic water body with a vast alluring garden developed by Nizam of Hyderabad. The park spreads over 33 acres enriched with fountains and colorful profusion of flowering plants, an enchanting summer house well laid out gardents, an island and hilltop guest house thus making it a favored getaway.

These exists a deer park, facilities for trekking and water sports which are additional attractions nestled at the destination. Ali Sagar is a very important picnic spot near Nizamabad. Ali Sagar in simple words is a very colorful and beautiful garden developed to attract picnickers from Nizamabad.

Ashok Sagar:

Ashok Sagar is located at janakampet village, yedpally mandal at a distance of about 7 k.m from Nizamabad and 26 k.m from Basara. This is situated on the route to the Famous saraswathi temple at basar from Hyderabad. It is a huge reservoir comprising of a beautiful Rock garden, octagonal Shaped restaurant, swinging bridge, boating facilities and children park.

The garden is spread over an area of 2 acres with beautiful landscape and attractive natural setting rock cuts.

There exists a 15 ft marble statue of Goddesses saraswathi in the middle of the water. The lake is scenic with a backdrop of hilly landscapes. Boating facility is available at the lake as well, and the rock garden itself makes for some fascinating viewing in a couple of spots. Landscaped rock garden with winding path in the midst of rocks gives a memorable experience to the visitors.

Sri Ram Sagar:

Pochampad Dam, also known as “Sri Ram Sagar project” Stands tall across Godavari River Which is considered as a Lifeline of North Telangana Region. Beautiful garden has been developed at the dam premises which offers boating facility in the picturesque waters of the massive reservoir. An island near the dam is a retreat for the migratory birds throughout the year. The tourism Department facilities the tourists with boating facility in the vast reservoir. This location serves as an ideal picnic spot for people from neighboring towns. Dam is located towards north 53 k.m away from Nizamabad.

Mallaram Forest:

Mallaram forest is situated at a distance of 8 k.m to the south west of Nizamabad town. It is a complete woody and dense forest which come to migratory birds and animals.

The pristine surroundings, fresh air and chirping of birds making it a perfect picnic spot for the tourist visiting the place Located in idyllic surroundings, it is considered as perfect place for eco tourism.

The major attractions are forest treks, a pagoda and a tower which serves as a view point tower. There are seating spaces along the mallaram cheruvu providing scenic view of the location. The forest department as provided seating arrangements for tourist overlooking the mallaram cheruvu. The forest boats of 1.45 Billion years old rock that pulls you into lap of nature. According to the geologists, this famous mushroom shaped rock at mallaram forest dates back 2000 Million years ago which also has a rock pedestal that strikingly resembles the upper portion of a mushroom.

Public Health & Municipal Engineering
